IMPORTANT: Please be accurate. There is a fee to reactivate a disposed female.

Use Disposal code 50 for any other breed registered females, Angus, Red Angus, Simmental , etc., that you wish to remove from your inventory this year because they will have a calf that will be recorded in another breed's registry. By using the "50" code you will not be charged a reactivation fee to put this cow back on your inventory in subsequent years. If you wish to remove these females from your inventory permanently, use the standard disposal codes.
