ProHart is excited to offer our first Balancer Futurity nominee, Leviathan 341L. Deep ribbed, extended front end, with a muscle pattern that completes his phenotype; 341L has a genotype and pedigree to match. His Dam, BEAS 2704 was selected as a heifer from the Beastro Dispersion. 341L is her first calf; we think she hit it out of the park! Her Angus sire, Krebs' KR Synergy, bridges the gap between calving ease and performance. Leviathan's sire, High Rev 20G, has elevated our program with many high-quality replacements and bull groups boasting herd bull quality year after year. This homo-black, homo-polled herd bull prospect has 13 EPD traits above the breed average: CED 35%, BW 35%, WW 5%, YW 10%, TM 15%, CEM 10%, HP 30%, PG30 15%, ST 25%, DOC 25%, SC 30%, CW 45%, FPI 15%. We would be honored to have your consideration of ProHart Leviathan 341L as this year's People's Choice.

Cow families. Look at them, analyze them, and figure out the ones that are making the great ones. SEPT KKKG Lincoln Lawyer is just that kind of a bull, backed by one the best cow families in the Gelbvieh breed Promises Promises. Sired by Rumpfelt's Primetime going back to one of the number one sires in the Angus breed Deer Valley Growth fund, explosive EPD's. His Dam is SEPT Hellcat Maggie, a picture perfect uddered and beautiful cow. Lincoln Lawyer is super thick topped deep and full of red meat with added extension throughout. His maternal sister is SEPT Hellcat Maganolia, Champion Balancer Heifer 2023 Kansas/Nebraska State Show for Kallen Warner. You will search long and hard to find a bull that combines this kind of proven genetic profile and balanced phenotype.

Money Shot is the result of a mating that we knew from the start would work, and wouldn't you know the 515 cow has done it again! The 515 cow has become a mainstay at Barwick Gelbvieh and one we can count on to consistently set the bar. She has now produced 2 bulls that have went on to be our lead off bulls in our production sale and high sellers. Money Shot is no exception to the quality standard we expect of this great female. He is stout from the ground up starting from his sound foot and bone structure to his bold center mass and on up to his wide, expressive topline. Bulls that are built this stout and backed by a maternal legacy are what continues to drive the beef industry in a positive direction. We thank you for your consideration and hope that you admire this bull as much as we do.

Plus One Cattle Company is proud to present our first herd bull prospect for your consideration in the People's Choice Balancer Futurity. BLMC High Caliber 270L154 ET is the result of several years of strategic planning. We fell in love with his sire, Musgrave Sky High 1535, and decided we needed to include him in our program, but we needed the right female. We found the perfect match, JRI Ms Dazzler 270X872, when we helped a friend haul some cows in 2020. Shortly thereafter we purchased an embryo flush and the countdown began. While the arrival of High Caliber this past spring was long awaited and greatly anticipated, it was worth the wait. We feel this 50 percent Balancer combines a balanced set of EPD's and an attractive phenotype all in a moderately framed package while maintaining structural integrity. We could talk about this bull all day, but we believe he speaks for himself as he is correct on his feet and legs, clean fronted, long sided, deep bodied, and has the muscle shape to match. Thank you for your consideration of BLMC High Caliber 270L154 ET.

We are excited to present HTFB Hilltops Lonestar L324 as one of our 2024 People's Choice Balancer Bull Futurity entries. Lonestar is a rugged made, deep bodied stout bull that at weaning time caught our eye rather quickly as being a calving ease individual that still has the look and ruggedness to be a sought- after herd sire prospect. Lonestar is sired by a past balancer bull futurity winner JRI Probity 254D28 who took the breed in the right direction. Did I mention Lonestar nursed an extremely nice first calf heifer that is a daughter of TAU Leader 35C who we purchased from Taubenheim Gelbvieh to add body and natural thickness to our herd. L324 is a Homozygous black and Homozygous polled, beef bull that offers a look of true power and structural integrity. Thank you for your consideration of this future herd sire and we will see you in OKC. Hilltop Farms is committed to raising quality seedstock.

HTFG Hilltops Lightening Rod L344 is a homozygous black, homozygous polled, 50% balancer that simply represents the kind of cattle we strive to produce at Hilltop Farms. As you study this extremely square built herd bull prospect you will greatly appreciate how true he really is. Lightening Rod is what he is, long bodied, square hipped and certainly doesn't disappoint you as you look down his top. L344 is built for longevity as he stands on an excellent set of feet and legs and gets out and travels good for as heavy muscled as he is. Lightening Rod is sired by one of our senior balancer herd sires TOG Twin Oak Pay Weight 839F ET, who was a high seller for Post Rock Cattle Company in 2020 and man has he created a "storm" around here as his 2023 calf crop from top to bottom is an impressive set of calves. F810, Lightening Rod's dam is a moderate framed, front pasture kind of a cow that is doing great things for our program. Lightening Rod will be at Cattlemen's Congress for your appraisal, and we appreciate your consideration of this future herd sire. Hilltop Farms is committed to raising quality seedstock.

Post Rock Clock Work 164L8 is a unique and intriguing Homo Black and Homo Polled herd bull. Clock Work is in the initial sire group of past futurity champion Go Time, who walks the pastures at Post Rock. Maternally his dam is as eye appealing as anything on the ranch and is a newly minted donor for us. She achieved AGA Dam of Merit her first year of eligibility with a 108 WW ratio on four progeny and a 365 day calving interval. Individually Clock Work posts a 100 BW ratio and a 113 WW ratio ranking seventh in an 85 head contemporary group. When you study Clock Works pedigree you realize where his genetic prepotency and stunning phenotype come from. He's line bred to the legendary Angus sire Basin Payweight 1682 and the Balancer sire JRI Probity 254D28. Clock Work has some of the greatest cows in recent breed history behind him, JRI Clementine 254Z8, TJB 921U, EGL Evelyn U426, and DARC P401 as his granddams. Leland and Kyle easily agreed that both of these bulls have significant breeding value but couldn't decide on just one to run in this year's futurity.

Post Rock Pay Dirt 140L8 is a Homo Black Homo Polled power bull. A favorite from early on not just by us but all who visited this summer. Pay Dirt has found himself ahead of his contemporaries at every checkpoint. A true performance bull, rugged look, massive centered, and so much power from behind. Not uncommon for progeny of his donor dam Wilma 294Z8, she's done it again here adding one more elite herd bull to her resume. Match this powerhouse cow to Go Time's demanding presence and you can see all the pieces of this planned mating come together. We feel it is truly hard to combine this much power with the look and pedigree to back it all up. Leland and Kyle easily agreed that both of these bulls have significant breeding value but couldn't decide on just one to run in this year's futurity.

It is with great pleasure that we offer TAU Tombstone 39L for your inspection. 39L is a homozygous black homozygous polled 51% Balancer that offers a tremendous combination of phenotype and genetic merit. He is backed by one of our top donors, TAU Ms. Leverage 884F, who is also the dam of our new A.I. sire TAU Night Shift 69H. Tombstones look from any angle is tremendous. He is big footed, bold ribbed, and stout featured. He is as attractive and clean made as any bull we have ever brought to the Balancer futurity. His balanced EPD profile, with an emphasis on carcass quality is also intriguing. If you're looking for a proven pedigree with tremendous eye appeal and growth, take a look at TAU Tombstone 39L. Thanks for your consideration!

Crooked Creek Cattle Company would like to introduce you to our entry for the Balancer Bull Futurity, CCRK Limestone 3271L. We admire this bull for his ability to get out and move fluidly from both ends of his skeleton while still possessing tons of shape, dimension, and a clean neckline. He was the Reserve Champion Balancer Bull at the 2023 Iowa State Fair in both Jr. and Open class shows. Limestone's pedigree is stacked with breed leaders, including the CTR 198L and DLW Edison 6718X, the 2012 People Choice futurity Champion bull. His CED EPD is in the top 4% of the breed, and we believe this young herd sire will continue progressing the Gelbvieh breed's maternal traits forward. Thank you for considering CCRK Limestone 3271L, and we hope you will check him out in OKC.

JRI Roughrider 253L386 ET would be an ET son out of JRI Ms Patina 253D38, Judd Ranch's phenomenal 7-year-old donor female who flat produces powerhouse sons. Ms Patina's first baby is the ever-popular AI sire JRI Sustainabull 253F48, who reigned as the 2020 Intermediate National Champion Bull. Big-time producing ability runs mighty deep in Ms Patina's genetic makeup as she would be a full sister to Judd Ranch's calving ease/powerhouse herd sire JRI Prescribed Remedy 253E38. Ms Patina & Prescribed Remedy's unmatched producing ability comes as no surprise as their 14-year-old Dam of Merit honored dam JRI Ms Special Blend 253W28 happens to be the most dominate female ever produced at Judd Ranch with 26 natural & ET born calves to date. Rest assured; the performance is bred-in as Roughrider posted a scalebusting 1,090# actual weaning weight.

BGGR Patent K592 has been a standout since birth. He is a BGGR Payload son and out of one of our top cows in the program, BGGR 7131. The bull is made to produce awesome females for the most particular cattlemen. His long, clean neck fits nicely into his shoulder and transitions flawlessly into his deep rib cage and flanks. His hooks to pin structure is long and wide, hard pressed to find any better. He also travels on a structure that gives you confidence he will be able to move very well as an older bull to defy his age. We have a full sister in production as a 3 year old and she is the best female in her age group. Needless to say we are very excited for her future. She is very impressive, just like her full brother.

Balancer cattle blend maternal, muscle and carcass merit. Kramer 091K does this. Backed on the sire side by a maternal sister to the famous Angus Donor Y69 with an outcross Gelbvieh cow line that has produced multiple bulls used in seedstock herds. 091K is a wide topped, thick ended, breed leader for carcass weight while being top 4% for marbling. Combine that with breed leading calving ease and birth weight in a homo black, homo polled package. Kramer was developed out on the range with the rest of our fall bulls until yearling weights were taken. Thanks for considering Kramer 091K in the 2024 Balancer Futurity.

*Who will the membership select as the
Champion and Runners Up for the 2024 Balancer Futurity??*

2023 CHAMPION

DCSF POST ROCK PROMINENT 139K8 ET

Exhibitor: POST ROCK CATTLE COMPANY

2021 People's Choice Balancer Bull Futurity rule changes allow members to purchase additional straws of semen on the champion bull. The same rules apply on the additional semen purchased as with the initial 20 units each good standing member is offered.

Contact David Slaughter for complete details.
