For further DNA testing prices and information, please visit [www.gelbvieh.org](http://www.gelbvieh.org).

# American Gelbvieh Association Herd Assessments and Fees

*Rates and policies effective January 1, 2024*

To register animals with the American Gelbvieh Association, individuals must have an active membership. Members are considered active if members have paid annual Herd Assessment and dues applicable to membership type.

## **Herd Assessment (HAS) Rate:**

- HAS rate is \$30.00 for females over 13 months of age, as of January 1 of the current year.
- Payment of HAS for each female provides one HAS credit to be used for calf registration.
- Registrations for natural born multiple births (i.e. twins, triplets) will be no additional cost.

## **Annual Herd Assessments Due March 15:**

- Annual HAS are due March 15 or the following business day if the date falls on a weekend.
- Herd Assessments are made available on the AGA Online Registry Service starting January 1. Members that do not utilize the online registry system will have a paper copy mailed to them.
- Recorded member owners of females that are of Herd Assessment age as of January 1 of the current year are responsible for paying current year Herd Assessments on those females.
- HAS received after the due date (March 15 or following business day if the date falls on a weekend) will be charged late fees at the rate of an additional five percent from 1-30 days late; an additional 10 percent due from 31-60 days or an additional 15 percent due after 60 days.
- If herd assessments and member dues are not paid the member's account will become inactive and thus does not allow for calves to be registered or transferred.

## **Submit HAS Electronically:**

- Members are encouraged to complete Herd Assessments using the online registry service.
- All work submitted on paper is charged a \$2.00 processing fee per animal, per transaction.

## **Credit Ties to Cow:**

- HAS credit is tied to the cow each year and stays with the cow even if the cow is transferred.
- Credits cannot be used for a calf born in a different year from the same cow or transferred to another cow.

## **Registration of ET Calves:**

- Donor cows with paid HAS have one credit for use on a natural born calf or one ET calf per year.
- Recipient dams with paid HAS can use credit on ET calf.
- Additional ET calf registrations are charged the current HAS rate of \$30.00.
- Embryo must be in the embryo inventory on the member's AGA Online Registry Service account to register an ET calf by a non-owner of the donor dam.

## **Reactivation of Females:**

- Reactivating females not on current year's HAS inventory – Females over 13 months of age will be charged the previous HAS rate of \$25.00 for every year the female has not been on member's herd inventory. Female will then receive one registration credit for corresponding year.
  - *Example: Member disposes of a female in 2012. To reactivate female in 2016, member will be charged for four (4) years of HAS fees (4 x \$25 = \$100). Female will then receive credit for each calf born in 2013, 2014, 2015, 2016.*

## **Assessment on Cows Not on Inventory:**

- Cows that have never been on member inventory (AMGV or non-AMGV) are assessed the current HAS rate of \$30.00 at the time calf is recorded.

## **Free Transfers with Active HAS:**

- Transfers for active members are free if HAS are paid for the current year.
- Females of assessment age must have a paid HAS for current year to transfer.
